Technical Sheet

QDPRO64E

Quik Drive Tool for Flooring and Decking Applications

The QDPRO64E is a Quik Drive attachment suitable for screws ranging from 38mm to 64mm in length. The serrated nose piece provides increased stability and prevents skidding on smooth or slippery surfaces. Quik Drive attachments are manufactured containing PTFE to reduce friction and impart non-stick properties meaning that no lubrication is required. Available with or without extension pole.

Removable, non-slip spiked nose piece

Adjustment knob for controlling the depth of the screw head in the mounting bracket

Features

Material

- Manufactured containing PTFE
- No lubrication required

Benefits

- Connects easily with screw gun adapter or extension
- Possible 360° rotation of attachment on adapter or extension
- Self-lubricating material for long life and smooth operation
- Self-locking depth adjustment for consistent countersinking of screws
- Available as attachment only or with extension pole
- Replaceable serrated teeth to prevent skidding or slipping

Available Kits

QDPRO64E: Includes Quik Drive attachment, mandrel, driver bits, quiver and small carry case
QDPRO64KE: Includes Quik Drive attachment, mandrel, driver bits, quiver, large carry case and extension pole

Applications

Common Applications

- Flooring
- Decking
- Fixing cement board

Installation

Remove screw driver sleeve.

Then remove the cap.

Install the adaptor.

Insert the mandrel.

Engage the gun with the mandrel and snap it onto the adapter.

Insert the tape screw tip pointed up: your screwdriver is ready!
